Mobile App   Automated Testing

Client Country: 📍 UAE, Abu Dhabi

Years of Development: 📅 2022 (8 months)

Client Background

Early-stage Fintech company. Abu Dhabi Investment Firm that is building a Digital Bank with a banking license and a seed capital of more than $500 Million.
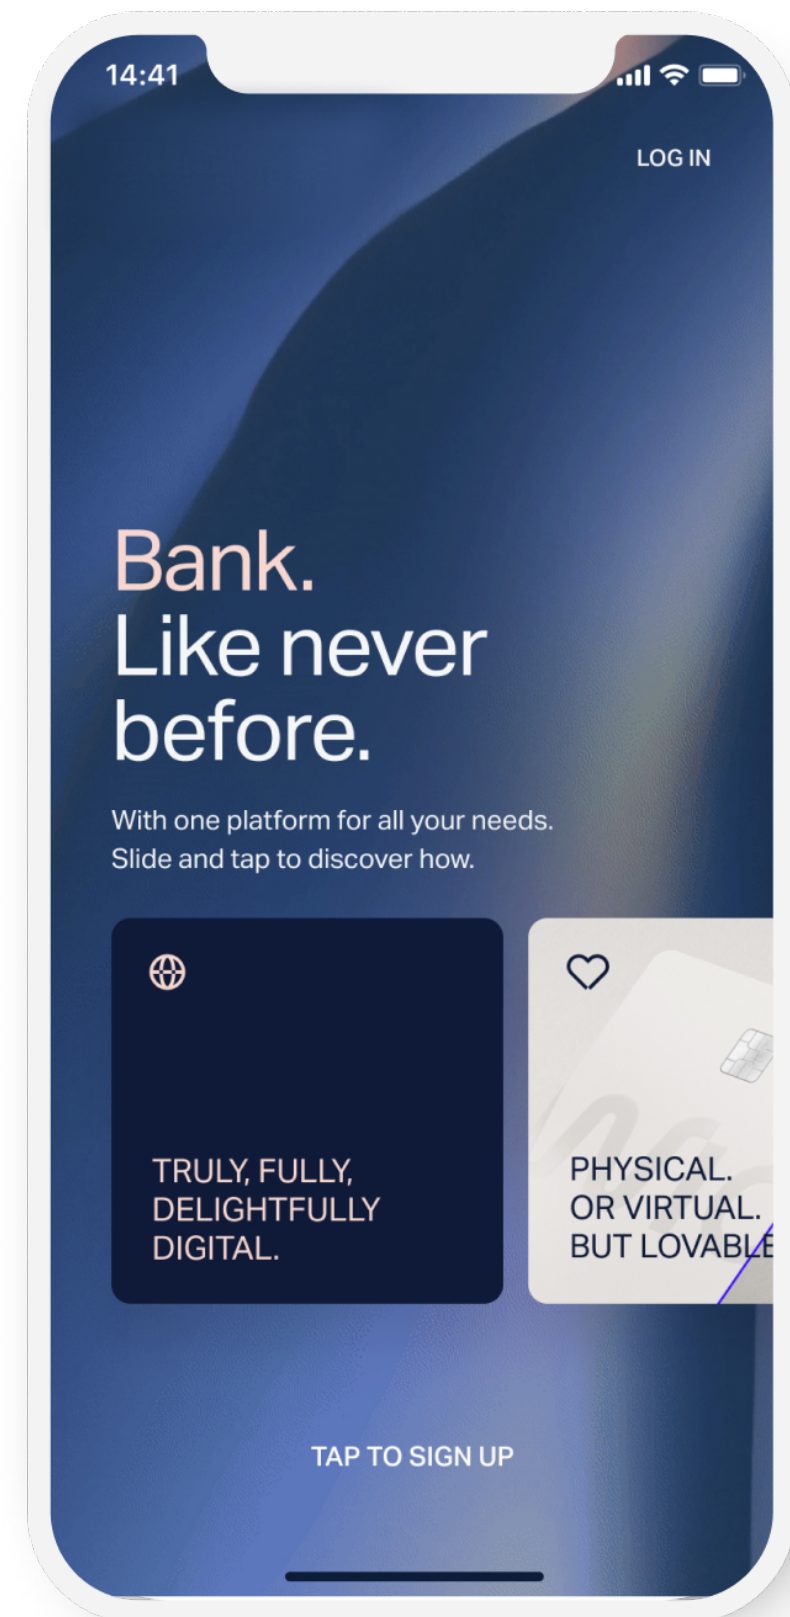

🏁 Business Goal

The goal of online banking is to get your time back with one intelligent bank account that keeps you in control. The goal of our part of work was to automate the testing of core banking functionalities to provide a stable and positive user experience.

💼 Business Result

Users now spend their time much more accurately while using online banking for personal and business goals.

Considerably less support tickets opened after test automation.

User satisfaction and referrals of the users have been increased.

Tech stack

Back-end: JAVA Spring Boot, Azure DevOps, Kubernetes, Kafka, MongoDB, Liquibase, Postgresql, GraphQL, Lombok
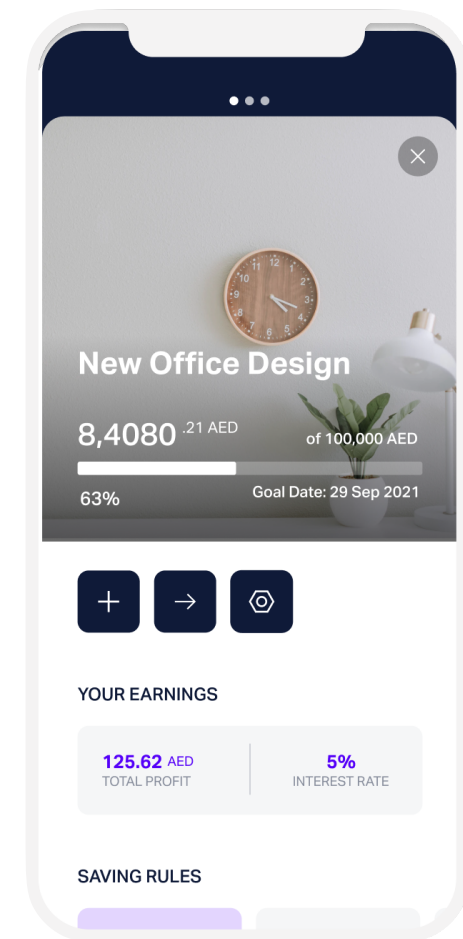

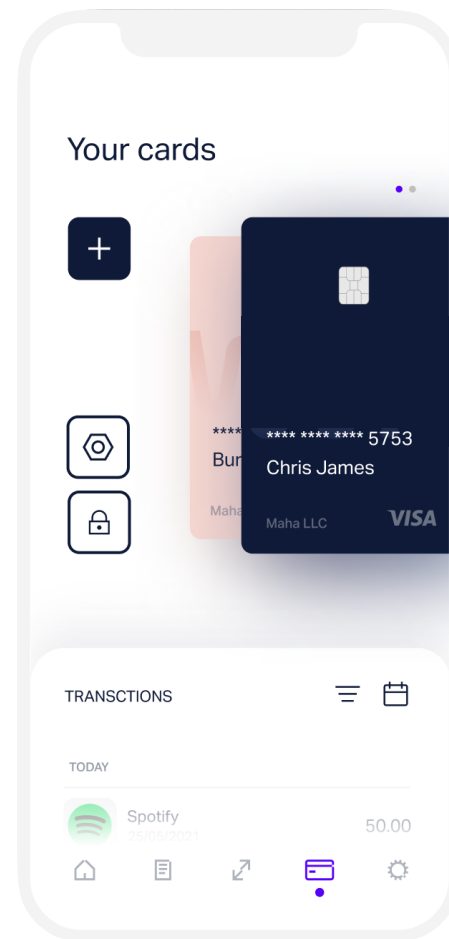

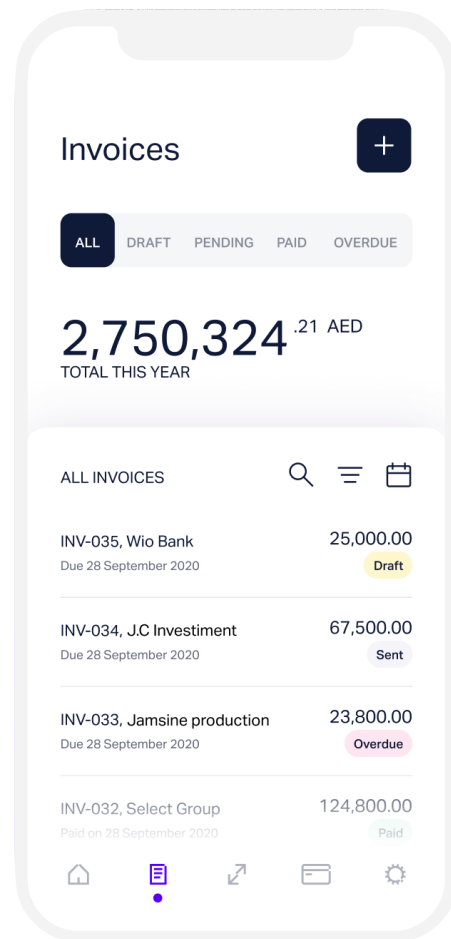

Front-end: Flutter, Vaadin
